Amendment dated: July 14, 2003  
Reply to Office Action of: March 14, 2003

MAT-6280US

9/3/03

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

41  
1.-51. (Cancelled).

52. (Currently Amended) A digital camera comprising:

(a) a memory which is separatable from said digital camera;  
(b) a picture capturing unit for capturing picture information corresponding to an image and for storing said picture information in said memory while said memory is attached to said camera;

~~a display unit for displaying an image derived from said picture information;~~  
(c) a control information processor for signaling to said memory how said image derived from said picture information is to be rotated during imaging of said image when said memory is separated from said camera, said signaling initiated after said picture information is captured; and

(d) a display unit for displaying according to a user operation a rotated image of said picture information.

5790193  
C3/32-35  
CS/1-4  
53. (Previously Presented) A digital camera according to claim 52, wherein said picture information is printed from said memory when said memory is separated from said digital camera.

54. (Currently Amended) A digital camera comprising:

a memory which is separatable from said digital camera;  
a picture capturing unit for capturing picture information corresponding to an image and for storing said picture information ~~is-in~~ said memory;  
~~a display unit for displaying an image derived from said picture information;~~

a control information processor for signaling to said memory how said image derived from said picture information is to be rotated during printing said picture information, said signaling initiated after said picture information is captured; and

a display unit for displaying according to a user operation a rotated image of said picture information.

55. (Currently Amended) A digital camera comprising:

a memory which is separatable from said digital camera;

a picture capturing unit for capturing picture information and for storing said picture information in said memory;

~~a display unit for displaying said picture information which is captured in said memory while said memory is attached to said digital camera;~~

~~a rotation unit for rotating said picture information which is captured and which is displayed at said display unit according to a user operation, and for storing in said memory a rotation control information indicating how said picture information which is captured is rotated; and~~

a control information processor for storing in said memory a print control information indicating how said picture information which is captured is to be printed, said print control information including rotation control information indicating how said picture information which is captured is rotated, said picture information being printed from said memory when said memory is separated from said digital camera; and

a display unit for displaying according to a user operation said rotated picture information.

56. (Currently Amended) A digital camera according to claim 52, wherein a rotation angle of said image displayed at said display unit is changed by 90 degree upon actuating said rotation unit according to said user operation.

57. (Currently Amended) A digital camera according to claim 53, wherein a rotation angle of said image displayed at said display unit is changed by 90 degree upon actuating said rotation unit according to said user operation.

58. (Currently Amended) A digital camera according to claim 54, wherein a rotation angle of said image displayed at said display unit is changed by 90 degree upon actuating said rotation unit according to said user operation.

59. (Currently Amended) A digital camera according to claim 55, wherein a rotation angle of said image-picture information displayed at said display unit is changed by 90 degree upon actuating said rotation unit.

60. (Currently Amended) A digital camera according to claim 52, wherein size of said image displayed at said display unit is automatically adapted to size of said display unit when changing said-a rotation angle of said image.

61. (Currently Amended) A digital camera according to claim 53, wherein size of said image displayed at said display unit is automatically adapted to size of said display unit when changing said-a rotation angle of said image.

62. (Currently Amended) A digital camera according to claim 54, wherein size of said image displayed at said display unit is automatically adapted to size of said display unit when changing said-a rotation angle of said image.

63. (Currently Amended) A digital camera according to claim 55, wherein size of said image displayed at said display unit is automatically adapted to size of said display unit when changing said-a rotation angle of said picture information.

64. (Cancelled).
